New Zealand Department of Agriculture.

THE NEW ZEALAND JOURNAL OF AGRICULTURE.

VOL. XXXIX.
(JULY - DECEMBER, 1929.)

Published by direction of
The Hon. G. W. Forbes,
Minister of Agriculture.

Editor: R. H. Hooper.

WELLINGTON.
BY AUTHORITY: W. A. G. SKINNER, GOVERNMENT PRINTER.
1929.

THE NEW ZEALAND

JOURNAL OF AGRICULTURE.

VOLUME XXXIX.

(July – December, 1929.)

INDEX.

A.

Abortion, contagious bovine, 296, 374.
Abortion, contagious, control of in cattle, 37.
Actinomycosis in dairy stock, 286.
Adamson, N. J.—The orchard, 55, 127.
Agricultural shows, season 1929–30, 216, 287, 362, 433.
Allan, H. H.—Spartina Townsendii : A valuable grass for reclamation of tidal mud-flats, 313.
Annual sheep returns, 1929, 284.
Answers to inquiries, 70, 140, 210, 286, 358, 432.
Aphis on pear-tree roots, 123.
Apiary, the (monthly notes), 61, 133, 203, 275, 349, 419.
Apples and pears, export, handling of, 248.
Apples and pears, varieties of exported, season 1929, 143.
Apples, blister disease or cracking of, 305.
Areas under cereals and potatoes, estimated, 362.
Arecoline hydrobromide for dog tapeworms, 360.
Arsenical spray for blackberry, &c., 287.
Arthritis in lambs, 358.
Artichokes, cultivation of, 211.
Aston, B. C.—
  Mineral content of pastures research : Extracts from report on work in New Zealand for year 1928–29, 18, 79.
  Limestone samples analysed, 411.
Atkinson, Esmond—Weeds and their identification : Black nightshade, 100.

B.

Bay of Plenty, maize-growing in the, 146.
Beekeeping inquiries, 359.
Black nightshade, 100.
Blending of New Zealand butter in Britain, 373.
Blister disease or cracking of apples, 305.
Blood in cow's milk, 70.
" Blowing " of cows on spring pasture, 359.
Board of Agriculture personnel, 124.
Bone-char, 67.
Bovine mastitis, 236.
Bovine parturient eclampsia, 325.
Boys and girls' agricultural club movement, Government assistance to, 337.
Boys and girls' agricultural clubs : Taranaki and Wellington district competitions, season 1928–29, 332.
Boys and girls' agricultural clubs : The movement in Southland, season 1928–29, 409.
Brogan, F. J. A., and Grimmett, R. E. R. —The soils of Tokaanu, 385.
Brown, F. C.—Poultry-keeping, 58, 130, 201, 273, 347, 418.
Brown-rot in stone-fruits : The Henderson control experiments, 97.
Butter and cheese grading, leading factory averages, 1928–29, 207.
Butter and cheese gradings, season 1928–29, 144.
Butter, blending of in Britain, 373.
Butter manufacture without preservatives, 307.
Butter, packing of for export, 27.
Butter, testing for water-content, 216.
Butter, unsalted, moulds in, 38, 106, 174.

C.

Calcium deficiency, live-stock diseases associated with, 35.
Canker in dog's ear, 140.
Casein manufacture and grading, 160.
Census and Statistics Office—Live-stock in New Zealand, 1929, 430.
Cereals, estimated area under, 362.
Certification of grass and clover seeds: System established by the Department of Agriculture, 289.
Certification of seed potatoes: Certificates issued on final tuber inspection season 1928–29, 143, 216.
Certified seed wheat, 17.
Cheese, maturity of early-made, 93.
Chemical control of ragwort: Experimental work at Mamaku, 382.
Chemical eradication of ragwort, 256.
Chewings fescue seed, 278.
Chewings fescue, top-dressing, 210.
Chou moellier for sheep, 212.
Churn, sterilization of the, 142.
Cider-making, 266.
Cinnabar moth and ragwort control, 9.
Citrus fruitgrowing in New Zealand, 48.
Citrus-culture notes, 57, 130, 200, 270, 347, 417.
Clark, A. F.—Insects infesting opossum-skins in New Zealand, 260.
Clearing gorse with the draining-spade, 124.
Clubs, boys and girls' agricultural, 332, 409.
Cocksfoot, laying down for seed purposes, 71.
Cocksfoot strains, 363.
Codlin-moth, control of in orchards, 396.
Compensation paid for stock and meat condemned, 288.
Connell, R. P.—The farm, 195, 267, 341, 412.
Contagious bovine abortion, 296, 374.
Control of brown-rot in stone-fruits: The Henderson experiments with peach-trees, 1925–29, 97.
Control of codlin-moth in orchards, 396.
Control of contagious abortion in cattle, 37.
Control of ragwort through insects: Experimental work with cinnabar moth, 9.
C.O.R. lists, 65, 280, 353, 424.
"Cow-grass" and red clover, 71.
Cow-pox, suspected, 141.
Cows, "blowing" of, on spring pasture, 359.
Cracking of apples, 305.
Cream-grading, 288.
Cream, stale cloths and bad flavour in, 78.
Crop areas and yields, seasons 1927–28 and 1928–29, 434.
Crown-grafting matured fruit-trees: The inlay method, 185.

D.

Dairy apparatus, sterilization of, 338.
Dairy-cow diseases, 236, 296, 374.
Dairy cows, care of during the winter months, 53.
Dairy Division—
Testing of purebred dairy cows (C.O.R. lists), 65, 279, 353, 424.
The official herd-test, 179.
Grading of export butter and cheese: Leading dairy-factory averages for year 1928–29, 207.
Dairy-herd testing in New Zealand: Review of the 1928–29 season, 217.
Dairy factories in New Zealand, 1929, 5.
Dairy-farm milking-sheds, condition of, 141.
Dairy-herd testing in New Zealand: Review of the 1928–29 season, 217.
Dairy instruction, farm, 247.
Dairy machinery, metals for, 114.
Dairy pipe-lines, cleaning of, 46.
Davey, M.—Crown-grafting of matured fruit-trees: The inlay method, 185.
Davies, J. E.—Boys and girls' agricultural clubs: The movement in Southland, season 1928–29, 409.
Davies, W., and Levy, E. B.—Strain investigation relative to grasses and clovers, 1, 363.
Deem, J. W.—
Ensilage on the farm, 161.
Waimate West Demonstration Farm, 1928–29, 398.
Deer pest: Action by State Forest Service, 427.
Diamond-backed moth, control of, 423.
Diet of young dogs, 70.
Direct sowing for tree plantations, 319.
Diseases of dairy cows: Observations in European centres, 236, 296, 374.
Dogs, young, diet of, 70.
Dominion Treasure Lass (photo), 209.
Dry-rot of swedes: Some field observations and experiments on control, 86.
Duff, A. S., and Tennent, R. B.—Manurial top-dressing of lucerne, 320.

E.

Earp, E. A.—The apiary, 61, 133, 203, 275, 349, 419.
Eclampsia, bovine parturient, 325.
Ensilage for sheep, 140.
Ensilage inquiries, 286.
Ensilage on the farm: Methods of making and handling, 161.
Estimated areas under cereals and potatoes, 362.
Everett, P.—Citrus fruitgrowing in New Zealand, 48.
Exports from New Zealand for years ended 30th June, 1928 and 1929, 142.

F.

Farm dairy instruction, 247.
Farm, the (monthly notes), 52, 125, 195, 267, 341, 412.
Farmers' field competitions: Taranaki, Wanganui, and Feilding districts, season 1928–29, 392.
Fertilizer importations (quarterly), 144.
Field competitions, farmers', 392.
Fields Division—
  Phosphate top-dressing of hill grassland, 103.
  The farm (monthly notes), 125.
Fig-trees, fruiting of, 433.
Fireblight, control of, 427.
Fish-taint in pig carcasses, 270.
Flower-culture for making of perfumes, 70.
Foot trouble with sheep, 211.
Fowl manure, utilization of, 432.
Frost-prevention for orchards: Experiments and experience in Central Otago, season 1928–29, 155.
Fruit export guarantee and regulations, 1930, 434.
Fruit maturity, storage, and transport conditions for export in 1929 season, 248.
Fruit varieties for North Auckland conditions: Results at Tanekaha test area, 191.
Fumigation of imported tree-seed, 360.

G.

Gastritis, parasitic, in lambs, 227.
Goodwin, B. G.—Blister disease or cracking of apples, 305.
Gorse, clearing with the draining-spade, 124.
Grading of export butter and cheese: Leading dairy factory averages for year 1928–29, 207.
Gradings of butter and cheese, season 1928–29, 144.
Grafting matured fruit-trees: The inlay method, 185.
Grape-vines for New Zealand conditions: Further test importations from Europe, 262.
Grass and clover seeds, certification of, 289.
Grasses and clovers, strain investigation relative to, 1, 363.
Grass-farming, intensive, at Manawaru, 228.
Grasslands of Mackenzie Country, 73.
Grimmett, R. E. R., and Brogan, F. J. A.—The soils of Tokaanu, 385.
Grimmett, R. E. R., and Taylor, C. R.—Chemical control of ragwort: Experimental work at Mamaku, 382.
Grimmett, R. E. R.—Chemical eradication of ragwort, 256.
Gum-land experimental farm at Puwera, 180.

H.

Hadfield, J. W.—Certification of grass and clover seeds, 289.
Hamblyn, C. J.—
  Clearing gorse with the draining-spade, 124.
  Lucerne in Whangarei district: Successful establishment on volcanic land, 253.
  Northern Wairoa Demonstration Farm, season 1928–29, 326.
Handling of export apples and pears: Investigation of maturity, storage, and transport conditions in 1929 season, 248.
Herd-testing in New Zealand, 1928–29 season, 217.
Hop-disease, 399.
Horticulture Division—
  Handling of export apples and pears: Investigation of maturity, storage, and transport conditions in 1929 season, 248.
Horticulture (monthly notes), 62, 134, 204, 276, 351, 421.
Howard Estate Advisory Board, 67.
Hudson, A. W.—Intensive rotational grazing of pastures, 400.
Hydatid disease, prevention of, in man and animals, 257.
Hyde, W. C.—Horticulture, 62, 134, 204, 276, 351, 421.

I.

Imperial agricultural research bureaux, 361.
Imperial Bureau of Soil Science, 17.
Inlay method of grafting fruit-trees, 185.
Inquiries, answers to, 70, 140, 210, 286, 358, 432.
Insects infesting opossum-skins in New Zealand, 260.
Intensive grass-farming: Dairy-farm experiment at Manawaru, season 1928–29, 228.
Intensive rotational grazing of pastures, 400.
Interim return of sheep at 30th April, 1929, 72.
Interim returns of live-stock, 105.
Inventions of agricultural interest, 72, 212, 361.

J.

Jersey cattle, white tongue and markings in, 210.

K.

Keas, bonus for destruction of, 247.
Kidson, E.—Weather records, 68, 138, 213, 282, 356, 428.
Kikuyu-grass, 71.
Killings at meat-export works, 288.

L.

Lambing estimates, 362, 431.
Levy, E. B., and Davies, W.—Strain investigation relative to grasses and clovers, 1, 363.
Lice-infested sheep, 331.
Lick for sheep and cattle, 432.
Limestone samples analysed, 411.
Liver-fluke in sheep, 355.
Live-stock diseases associated with calcium deficiency, 35.
Live-stock Division—
  Farm notes, 53, 198, 270, 343, 412.
  Vaccine treatment for contagious mammitis in dairy cows, 244.
  Prevention of hydatids in man and animals, 257.
  Estimates of the season's lambing, 431.
Live-stock in New Zealand, 1929, 430.
Live-stock, interim returns of, 105.
Lucerne in Whangarei district: Successful establishment on volcanic land, 253.
Lucerne, manurial top-dressing of, in Central Otago, 320.
Lupins, growing for green manuring and seed, 211.
Lymph-adenitis in sheep, preventive measures against, 343.
Lyons, J.—Bovine parturient eclampsia, 325.

M.

Mackenzie Country grasslands: Progress of natural regeneration and experimental sowings, 73.
Magpie moth and ragwort, 9.
Maize-growing in the Bay of Plenty: Present methods and some suggested improvements, 145.
Mammitis, contagious, vaccine treatment for, in dairy cows, 244.
Manawaru, intensive grass-farming experiment at, 228.
Manurial top-dressing of lucerne: Experiments in Central Otago, 320.
Mastitis, bovine, 236.
McDowell, F. H.—Metals for dairy machinery, 114.
McGillivray, R.—The Mackenzie Country grasslands, 73.
McIndoe, G. H.—The orchard, 198, 271, 344, 415.
Meat-export works killings, 288.
Metals for dairy machinery, 114.
Miller, D.—Control of ragwort through insects: Experimental work with cinnabar moth, 9.
Mineral content of pastures research: Extracts from report on work in New Zealand for year 1928–29, 18, 79.
Molasses, feeding of to cows, 210.
Morgan, G. F. V.—
  Moulds in unsalted butter, 38, 106, 174.
  Sterilization of dairy apparatus, 338.
Motion, J. Hill—Diseases of dairy cows: Observations in European countries, 236, 296, 374.
Moulds in unsalted butter: Research at Wallaceville Laboratory, 38, 106, 174.
Murray, R. B. H.—Live-stock diseases associated with calcium deficiency, 35.

N.

Nauru and Ocean Islands phosphate: Working operations and shipments, 281.
Neill, J. C.—Dry-rot of swedes, 86.
Northern Wairoa Demonstration Farm: Notes on operations in 1928–29 season, 326.
Noxious weeds control, 266.
Noxious weeds orders, 212.

O.

Official herd-testing of purebred dairy cows: Survey of second season's work, 1928–29, 308.
Official herd-test, the, 179.
Opossum-skins, insects infesting, in New Zealand, 260.
Orchard, the (monthly notes), 55, 127, 198, 271, 344, 415.
Orchards, frost-prevention for, 155.

P.

Packing of butter for export, 27.
Parasitic gastritis in lambs, 227.
Paspalum pasture, sod-bound, treatment for, 140.
Pastures, intensive rotational grazing of, 400.
Pastures, research into mineral content of, 18, 79.
Pears and apples, export, handling of, 248.
Perennial rye-grass, strains of, 1.

Perfumes, flower-culture for making of, 70.
Permits for keeping rabbits, 212.
Phosphate deficiency in Wairarapa localities, 79.
Phosphate, Nauru and Ocean Islands, 281.
Phosphate top-dressing of hill grassland : Manawatu farmer's recorded results, 103.
Pipe-lines, dairy, cleaning of, 46.
Pipe system of spraying for vineyards, 94.
Potatoes, estimated area under, 362.
Potatoes, yields of, season 1928–29, 144.
Poultry Congress, the World, 190.
Poultry-keeping (monthly notes), 58, 130, 201, 273, 347, 418.
Prevention of hydatid disease in man and animals, 257.
Puwera Gum-land Experimental Farm : Pasture establishment and carrying-capacity, 180.

R.

Rabbits, permits for keeping, 212.
Ragwort, chemical control of, 382.
Ragwort, chemical eradication of, 256.
Ragwort, control of through insects, 9.
Red mite on apple-trees, control of, 359.
Registration of standard marks for stock, 288.
Regrassing of secondary-growth country, 295.
Research bureaux, Imperial agricultural, 361.
Rice, W. H.—Citrus-culture notes, 57, 130.
Rodda, T. E. — Stationary spraying system for vineyards, 94.
Rotational grazing of pastures, 400.
Rye-grass strains, 1.

S.

Seasonal notes, 52, 125, 195, 267, 341, 412.
Season's lambing : Estimates of, 362, 431.
Secondary-growth country, regrassing of, 295.
Seeds, grass and clover, certification of, 289.
Seeds importation regulations, 360.
Sheep blowfly, precautions against, 432.
Sheep, foot trouble with, 211.
Sheep, interim return of, 72.
Sheep returns, annual, 1929, 284.
Shelter-ring for stock, 47.
Shows, agricultural, 216, 287, 362, 433.
Singleton, W. M.—
Official herd-testing of purebred dairy cows : Survey of the second season's work, 1928–29, 308.
Blending of New Zealand butter in Britain, 373.
Smallfield, P. W.—
The farm, 53.
Puwera Gum-land Experimental Farm, 180.
Smith, J. M.—
Boys and girls' agricultural clubs : Taranaki and Wellington district competitions, season 1928–29, 332.
Farmers' field competitions : Taranaki, Wanganui, and Feilding districts, season 1928–29, 392.
Soil science, Imperial bureau of, 17.
Soils of Tokaanu : A reconnaissance survey, 385.
Solanum nigrum L., 100.
Spartina Townsendii : A valuable grass for reclamation of tidal mud-flats, 313.
Standard marks for stock, registration of, 288.
Stationary spraying system for vineyards : Experience at Te Kauwhata Horticultural Station, 94.
Sterility, temporary, of dairy cows, 105.
Sterilization of dairy apparatus : Live steam efficiency test at Wallaceville, 338.
Stock and meat condemned, compensation paid for, 288.
Strain investigation relative to grasses and clovers, 1, 363.
Stuart Wilson Cup award for 1928–29 season, 337.
Stud stock, exports of, 307.
Stud stock, importation of from abroad, 190.
Subscription remittance for *Journal* unidentified, 434.
Swedes, dry-rot of, 86.
Swedes, storing, for sheep, 141.

T.

Taylor, C. R., and Grimmett, R. E. R.—Chemical control of ragwort : Experimental work at Mamaku, 382.
Te Kauwhata Horticultural Station vineyard, stationary spraying system at, 94.
Temporary sterility of dairy cows, 105.
Tennent, R. B., and Duff, A. S.—Manurial top-dressing of lucerne : Experiments in Central Otago, 320.
Testing butter for water content, 216.
Testing of purebred dairy cows (C.O.R. lists), 65, 279, 353, 424.
Thorp, J. H.—Control of codlin-moth in orchards, 396.
Tobacco export, regulation of, 431.

Tobacco-growing notes, 62, 134, 206, 278, 352, 421.
Tobacco, preparing for smoking and spray, 358.
Tokaanu soils, 385.
Tomatoes, protection of from frost at Earnscleugh, 158.
Top-dressing Chewings fescue, 210.
Top-dressing of hill grassland, 103.
Tourretia volubilis declared a prohibited plant, 141.
Tree plantations, direct sowing for, 319.
Tree-seed, imported, fumigation of, 360.
Triona summer oil for spraying, 96.
Turner, E. Phillips.—The deer pest: Action by State Forest Service, 427.

V.

Vaccine treatment for contagious mammitis in dairy cows: Report by the Live-stock Division, 244.
Valentine, G. M.—Packing of butter for export, 27.
Varieties of apples and pears exported, season 1929, 143.
Vines for New Zealand conditions: Importations from Europe, 262.
Vineyards, stationary spraying system for, 94.

W.

Waimate West Demonstration Farm: Notes on operations for 1928–29, 398.
Wairarapa localities, phosphate deficiency in, 79.
Walker, C.—Maize-growing in the Bay of Plenty, 145.
Weather and wheat yield in Canterbury, 34.
Weather records, 68, 138, 213, 282, 356, 428.
Weeds and their identification: Black nightshade, 100.
Weeds, noxious, control of, 266.
Wheat, certified seed, 17.
Wheat, moisture and protein tests of, 331.
Wheat Research Institute, 37.
Wheat yield and weather in Canterbury, 34.
Williams, W. R. Lloyd.—Frost-prevention for orchards: Experiments in Central Otago, season 1928–29, 155.
Woodcock, J. W.—Intensive grass-farming: Dairy-farm experiment at Manawaru, season 1928–29, 228.
Wooden tongue in dairy stock, 286.
Wool-branding fluids, 160.
Wool research, 399.
World Poultry Congress, 1930, 190.
